309 Vs 308 As Primary

309 Vs 308 As Primary Ss Filler Rod Miller Welding Chaos KinGBoy 309 vs V.eros 308 A typical 309 can have a FN of approximately 12-18 FN, while the 308 is usually approximately 4-9 FN. Ferrite is beneficial in counteracting the possibility of hot cracking, or solification cracking. Both the 308 and the 309 have an All-Weld-Metal Tensile requirement of 80ksi

309 Vs 308 As Primary Ss Filler Rod Miller Welding

The 2 main advantages of using a 309 instead of a 308 when joining a stainless steel to another steel is 1) the higher chemistry,Cr=22.0-25.0 and Ni=12.0-14.0 for the 309, as opposed to Cr=18.0-21.0 and Ni=9.0-11.0 for the 308. And 2) the 309 has a higher ferrite percentage than the 308. A typical 309 can have a FN of approximately 12-18 FN, while the 308 is usually approximately 4-9 FN. Ferrite is beneficial in counteracting the possibility of hot cracking, or solification cracking.

308 vs 309

The best loads from the 309 (at the specified 47Kpsi) should get you right around 2800fps, the 308 (at 62Kpsi) gets 2950ish. If we push both to 62K, the increased powder capacity of the 309 give it about a 100fps edge on the .308. oh here are some of quickloads differences. WC of 308 is 56, the 309 is 62.

309 JDJ cartridge vs .308 winchester | The High Road

In short 308L is usually used in welding stainless steel materials of grade 301,302,304 grades.316L for welding stainless steel base metals of grade AISI 316 and 316L 309L is used in welding mild steel or low alloy steel to stainless steel or for joining dissimilar grades of stainless steel together.
