This book is designed to present, in one convenient source, comments published in periodicals about 325 automobile models manufactured since 1987 on a model-by-model basis. These periodicals range from general interest to specialized sources as well as repair manuals and other publications related to the individual models.

From 1963 to 1974, muscle cars were the kings of the road--no other American automobiles have ever inspired as much passion as these classic performance cars. Muscle Car Source Book is a one-stop resource for muscle car fans. Heavily illustrated with vivid color photography of all the muscle cars from the classic era (1963-1974) and chock full of data and historical facts, this is a reference book you will not want to put down! All of the manufacturers--Ford, Chevrolet, Pontiac, Buick AMC, Dodge, and Plymouth--are covered, and so are the cars, including the Camaro, Mustang, Charger, GTO, and many more! Statistics: All the performance data available for each car is presented in easily read tables. Specifications: Detailed specifications, including horsepower and torque ratings, curb weight, fuel capacity, stock wheel and tire sizes, and other key technical data unique to each model is given. Production numbers: Production information is broken down across all the performance variants and major features. Options: Major performance options available for each car including engine options, comfort features, gauge packages, and wheel-and-tire options are all outlined.

From the witty senior editor of Jalopnik, Gizmodo Media's acclaimed website devoted to cars, technology, and more, comes a revealing, savvy, and humorous look at self-driving cars. Self-driving cars sound fantastical and futuristic and yet they'll soon be on every street in America. Whether it's Tesla's Autopilot, Google's Waymo, Mercedes's Distronic, or Uber's 24,000 modified Volvos, companies across industries and throughout the world are developing autonomous cars. Even Apple, not to be outdone, is rumored to be creating its own technology too. In Robot, Take the Wheel, Jason Torchinsky explores the state of the automotive industry. Through wit and wisdom, he explains why autonomous cars are being made and what the future of automated cars is. Torchinsky encourages us to consider autonomous cars as an entirely new machine, something beyond cars as we understand them today. He considers how we'll get along with these robots that will take over our cars' jobs, what they will look like, what sorts of jobs they may do, what we can expect of them, how they should act, ethically, how we can have fun with them, and how we can make sure there's still a place for those of us who love to drive with manual or automatic transmission. This unique and highly readable volume is brimming with industry insider information and destined to be a conversation starter. It's a must-have for car lovers, technology geeks, and everyone who wants to know what's on the road ahead.

Haynes disassembles every subject vehicle and documents every step with thorough instructions and clear photos. Haynes repair manuals are used by the pros, but written for the do-it-yourselfer.

The trading, selling, and buying of personal transport has changed little over the past one hundred years. Whether horse trading in the early twentieth century or car buying today, haggling over prices has been the common practice of buyers and sellers alike. *Horse Trading in the Age of Cars* offers a fascinating study of the process of buying an automobile in a historical and gendered context. Steven M. Gelber convincingly demonstrates that the combative and frequently dishonest culture of the showroom floor is a historical artifact whose origins lie in the history of horse trading. Bartering and bargaining were the norm in this predominantly male transaction, with both buyers and sellers staking their reputations and pride on their ability to negotiate the better deal. Gelber comments on this point-of-sale behavior and what it reveals about American men. Gelber's highly readable and lively prose makes clear how this unique economic ritual survived into the industrial twentieth century, in the process adding a colorful and interesting chapter to the history of the automobile.

Decision to produce; Markets and uses; Market assessment; Production potential; Equipment selection; Financial requirements; Decision and planning worksheets; Basic ethanol production; Preparation of feedstocks, Fermentation; Distillation; Types of feedstocks; Coproduct yields; Agronomic considerations; Plant design; Overall plant considerations; Process control; Representative ethanol plant; Maintenance checklist; Business plan; Analysis of financial requirements; Organizational form; Financing; Case study; Summary of legislation; Bureau of alcohol, tobacco, and firearms permit information; Enviromental considerations.
