design and construction in the 12th and 13th centuries in the fictional town of Hagenburg unites a vast array of unforgettable characters whose fortunes are inseparable from the shifting political factions and economic interests vying for supremacy. From the bishop to his treasurer to local merchants and lowly stonecutters, everyone, even the town's Jewish denizens, is implicated and affected by the slow rise of Hagenburg's Cathedral, which in no way enforces morality or charity. Around this narrative core, Ben Hopkins has constructed his own monumental edifice, a choral novel that is rich with the vicissitudes of mercantilism, politics, religion, and human enterprise. Ambitious, immersive, a remarkable feat of imagination, Cathedral deftly combines historical fiction, the literary novel of ideas, and a tale of adventure and intrigue. We are now witnessing the build-out of society ' s first foundationally new infrastructure in nearly a century: the Cloud. afforded to the companies that build and own them, datacenters might be called the digital cathedrals of the twenty-first century. The emerging Cloud is as different from the communications infrastructure that preceded it, as air travel was different from automobiles. And, using energy as a metric for scale—since there are only two kinds of infrastructures, energy-producing and energy-using—today ' s global Cloud already consumes more energy than all aviation. Yet, as disruptive as the Cloud has already become, we are in fact just at the end of the beginning of what the digital masons are building for the twenty-first century.

England's cathedrals are the nation's glory. They tower over its landscape, outranking palaces, castles and mansions. They attract roughly half the nation's population each year. For a millennium they have been objects of pilgrimage for those seeking faith, consolation and beauty. Still at the start of the twenty-first century, they remain unequalled in their size and splendour. More than any other English institution, cathedrals reflect the vicissitudes of history and should be treasured as such. They are custodians of culture and of the rituals of civic life. They offer welfare and relieve suffering. They uplift spirits with their beauty. In a real sense they are still what they were when first built a millennium ago, a glimpse of the sublime. Gloriously illustrated
