and full-colour illustrations to make the basic principles easier to understand. Covering the core knowledge components of the current UEE11 Electrotechnology Training Package and referencing the new AS/NZS 3000:2018 Wiring Rules, this textbook is structured, written and illustrated to present the information in a way that is accessible to students. With a new focus on sustainable energy, brushless DC motors and the inclusion of student ancillaries, as well as structuring more closely to the knowledge and skills requirements for each competency unit covered, Electrical Principles, 4e is the ideal text for students enrolled in Certificate II and III Electrotechnology qualifications. With more than 800 diagrams, hundreds of worked examples, practice questions and self-check questions, this edition is the most up-to-date text in the market. The writing style is aimed at Certificate III students while

retaining the terminology typically used in the Electrical Trades. Additionally, the technical content does not break into a level above that of Certificate III. At all times the book uses illustrations integrated with the text to explain a topic.

Written to the core practical units of competency from the UEE11 Electrotechnology Training Package, Electrical Trade Practices 2e by Berry, Cahill and Chadwick provides a practical yet comprehensive companion text, covering the practical units within the UEE30811 Certificate III in the Electrotechnology Electrician qualification. Electrical Trade Practices is the practical volume to accompany Phillips, Electrical Principles.
