Gluten is found in wheat and some other grains. It's in foods people eat every day. Many people can eat it without problems. Others have a disease that makes gluten damage their bodies. Your Body on Gluten uncovers the nutritional benefits of foods containing gluten, how gluten interacts with the body, and how to include it as part of a balanced diet. Easy-to-read text, vivid images, and helpful back matter give readers a clear look at this subject. Features include a table of contents, infographics, a glossary, additional resources, and an index. Aligned to Common Core Standards and correlated to state standards. Core Library is an imprint of Abdo Publishing, a division of ABDO.

Designed for the undergraduate student with a calculus background but no prior experience with complex analysis, this text discusses the theory of the most relevant mathematical topics in a student-friendly manner. With a clear and straightforward writing style, concepts are introduced through numerous examples, illustrations, and applications. Each section of the text contains an extensive exercise set containing a range of computational, conceptual, and geometric problems. In the text and exercises, students are guided and supported through numerous proofs providing them with a higher level of mathematical insight and maturity. Each chapter contains a separate section devoted exclusively to the applications of complex analysis to science and engineering, providing students with the opportunity to develop a practical and clear understanding of complex analysis. The Mathematica syntax from the second edition has been updated to coincide with version 8 of the software. --

This authoritative guide to the great American redneck lifestyle covers more than 200 tips on everything from hunting and fishing to guns, grub and fun. Forget all the jokes, stereotypes and caricatures. The Total Redneck Manual is a loving celebration of an all-American cultural icon, as well as a practical guide full of homespun advice on how to enjoy the great outdoors. From skinning squirrels and rabbits to skinny-dipping, knife-throwing, and teaching your kid to flyfish, this comprehensive guide covers all the bases. In true Field & Stream fashion, it's packed with tips on essential outdoor skills, from picking the right hunting dog and sighting in a rifle to fixing just about anything with duct tape and frying up catfish just like grandma used to make. You'll also learn to open a beer bottle with just about anything, spit on a campfire with deadly accuracy, and kit out the truck of your dreams—with spray paint.

For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.

Detailed diagrams and instructions show how to repair various models of lawn, garden, and farm tractors

Arabic and Hebrew Love Poems in al-Andalus investigates a largely overlooked subset of Muslim and Jewish love poetry in medieval Spain: hetero- and homo-erotic love poems written by Muslim and Jewish religious scholars, in which the lover and his sensual experience of the beloved are compared to scriptural characters and storylines. This book examines the ways in which the scriptural referents fit in with, or differ from, the traditional Andalusian poetic conventions. The study then proceeds to compare the scriptural stories and characters as presented in the poems with their scriptural and exegetical sources. This new intertextual analysis reveals that the Jewish and Muslim scholar-poets utilized their sacred literature in their poems of desire as more than poetic ornamentation; in employing Qur’anic heroes in their secular verses, the Muslim poets presented a justification of profane love and sanctification of erotic human passions. In the Hebrew lust poems, which utilize biblical heroes, we can detect subtle, subversive, and surprisingly placed interpretations of biblical accounts. Moving beyond the concern with literary history to challenge the traditional boundaries between secular and religious poetry, this book provides a new, multidisciplinary, approach to existing materials and will be of interest to students, scholars and researchers of Islamic and Jewish Studies as well as to those with an interest in Hebrew and Arabic poetry of Islamic Spain.

The bestselling curtain book on the market is now in paperback, featuring more than 35 innovative projects presented step by step. 600 photos and illustrations.

In order to meet the ever-increasing demands for enantiopure compounds, hetero- ous, homogeneous and enzymatic catalysis evolved independently in the past. Although all three approaches have yielded industrially viable processes, the latter two are the most widely used and can be regarded as complementary in many respects. Despite the progress in structural, computational and mechanistic studies, however, to date there is no universal recipe for the optimization of catalytic processes. Thus, a trial-and-error approach remains predominant in catalyst discovery and optimization. With the aim of complementing the well-established fields of homogeneous and enzymatic catalysis, organocatalysis and artificial metalloenzymes have enjoyed a recent revival. Artificial metalloenzymes, which are the focus of this book, result from comb- ing an active but unselective organometallic moiety with a macromolecular host. Kaiser and Whitesides suggested the possibility of creating artificial metallo- zymes as long ago as the late 1970s. However, there was a widespread belief that proteins and organometallic catalysts were incompatible with each other. This severely hampered research in this area at the interface between homogeneous and enzymatic catalysis. Since 2000, however, there has been a growing interest in the field of artificial metalloenzymes for enantioselective catalysis. The current state of the art and the potential for future development are p- sented in five well-balanced chapters. G. Roelfes, B. Feringa et al. summarize research relying on DNA as a macromolecular host for enantioselective catalysis.
