THE WEST TRANSFORMED is a comprehensive introductory Western civilization or European history textbook. It covers a variety of fields of history including social history, but stresses traditional topics via its strong narrative. The development of civilization in the West is presented as a series of cultural, technological, social, and political transformations. This strong unifying theme focuses on the tensions between continuity and change in human affairs.

The industrialization of the American West during World War II brought about rapid and far-reaching social, cultural, and economic changes. Gerald D. Nash shows that the effect of the war on that region was nothing less than explosive.

The vastness of the American West is apparent to anyone who travels through it, but what may not be immediately obvious is the extent to which the landscape has been shaped by the U.S. government. Water development projects, military bases, and Indian reservations may interrupt the wilderness vistas, but these are only an indication of the extent to which the West has become a federal landscape. Historian Gerald Nash has written the first account of the epic growth of the economy of the American West during the twentieth century, showing how national interests shaped the West over the course of the past hundred years. In a book written for a broad readership, he tells the story of how America's hinterland became the most dynamic and rapidly growing part of the country. The Federal Landscape relates how in the nineteenth century the West was largely developed by individual enterprise but how in the twentieth Washington, D.C., became the central player in shaping the region. Nash traces the development of this process during the Progressive Era, World War I, the New Deal, World War II, the affluent postwar years, and the cold-war economy of the 1950s. He analyzes the growth of western cities and the emergence of environmental issues in the 1960s, the growth of a vibrant Mexican-U.S. border economy, and the impact of large-scale immigration from Latin America and Asia at century's end. Although specialists have studied many particular facets of western growth, Nash has written the only book to provide a much-needed overview of the subject. By addressing subjects as diverse as public policy, economic development, environmental and urban issues, and questions of race, class, and gender, he puts the entire federal landscape in perspective and shows how the West was really won. "It was the federal government that determined the pattern of farms in the humid regions, built the major roads and highways, and fostered the growth of the principle cities in the West. The federal government built the large dams and diverted important river systems throughout the West, determined the shape of the large military reservations and their environs, and forced Native Americans to occupy the reservations on which they can be found today. The government is largely responsible for the aerospace complexes and scientific research centers that became so important in the West during the second half of the twentieth century. In short, the federal government created a federal landscape in the West." --Gerald D. Nash

The West Transformed is a comprehensive, mainstream introductory Western Civilization or European History textbook. It covers a variety of fields of history including social history, but stresses traditional topics and a strong narrative. The development of civilization in the West is presented as a series of cultural, technological, social, and political transformations. A strong unifying theme focuses on the tensions between continuity and change in human affairs.

The development of civilization in the West is presented as a series of cultural, technological, social, and political transformations. A strong unifying theme focuses on the tensions between continuity and change in human affairs.

An exploration and celebration, in word and image, of how our way of life, that is, the Western way of life, has been transformed, and continues to be shaped, by the Church's faith. For each generation, the life and teachings of Christ has provided an answer to its deepest and most probing questions. Those questions remain. So do the human longings from which they spring. Where do we come from? How shall we live? Am I loved? What awaits after death? Many of our teachers, our law makers, our entertainers, and even our families, no longer retain the vital memory of the answers that faith offers. Thankfully, Dr. Ryan Topping does. Accompany him through these pages and awaken that memory for yourself and those you love. In this first volume, *The Gift of the Church: How the Catholic Church Transformed the History and Soul of the West*, Topping brilliantly describes the Church's indispensable role in the development of western civilization. He does so by identifying the various gifts which the Church, through the divine action of God, and the human actions of her members, has given to us - even those of us who have forgotten and those of us who never knew - gifts explained in chapters such as: Prophets: What Pagans and Jews were Expecting Martyrs: The Gift of Witness Scholars: The Gift of the Universities Crusaders: The Forgotten Gifts of the Christian Warriors Missionaries: The Gift of the Gospel for the New World Join Topping on a fascinating tour through the history of the West as influenced and affected by the Catholic Church. It promises to be a journey, and a gift, that you'll not soon forget.

Between 1800 and the Civil War, the American West evolved from a region to territories to states. This book depicts the development of the antebellum West from the perspective of a resident of the Western frontier.

Between 1800 and the Civil War, the American West evolved from a region to territories to states. This book depicts the development of the antebellum West from the perspective of a resident of the Western frontier. • Provides both a historical overview of the antebellum West and detailed examinations of specific issues that shaped Western responses to the Civil War, serving students in Western American history and general American survey courses as well as students of the Civil War • Explains how unique elements of the West, such as international influences, the military, the Indians, and settlement and legislation, created conflict that differed from what was experienced in the East during the Civil War
