Water Management Challenges in Global Change contains the proceedings of the 9th Computing and Control for the Water Industry (CCWI2007) and the Sustainable Urban Water Management (SUWM2007) conferences. The rationale behind these conferences is to improve the management of urban water systems through the development of computerbased methods. Issues such as economic globalisation, climate changes and water shortages call for a new approach to water systems management, which addresses the relevant technical, social and economic aspects. This collection represents the views of academic and industrial experts from a number of countries, who provide technical solutions to current water management problems and present a vision for addressing the global questions. The themes underlying many of the contributions include energy and material savings, water savings and the integration of different aspects of water management. The papers are grouped into three themes covering water distribution systems, sustainable urban water management and modelling of wastewater treatment plants. The water distribution topics cover asset and information management, planning, monitoring and control, hydraulic modelling of steady state and transients, water quality and treatment, demand and leakage management, optimisation, design and decision support systems, as well as reliability and security of water distribution systems. The sustainable urban water management topics include urban drainage systems, water reuse, social aspects of water management and also selected facets of water resources and irrigation. Computer control of wastewater treatment plants has been seen as less advanced than that of clean water systems. To address this imbalance, this book presents a number of modelling techniques developed specifically for these plants. Water Management Challenges in Global Change will prove to be invaluable to water and environmental engineering researchers and academics; managers, engineers and planners; and postgraduate students.

The popularity of The Seven Deadly Sins dates back to the 4th Century. They enjoyed tremendous notoriety during the period we call the Middle Ages. While the popular assortment of sins is not directly from scripture, they have been the subject of many a sermon, lecture, writing and art.In his book The Seven Deadly Sins: And Why We Love Them, Steinbacher examines each in detail. He gives examples of how they effect us and how we conduct ourselves in this world.Included in this book is Steinbacher's essayAn Angel In My Garden.

Celebrity Rehab star and Thelonious Monster frontman Bob Forrest's memoir about his drug-fueled life in the L.A. indie rock scene of the '80s and '90s and his life-changing decision to become a drug counselor who specializes in reaching the unreachable. Life has been one strange trip for Bob Forrest. He started out as a suburban teenage drunkard from the Southern California suburbs and went on to become a member of a hip Hollywood crowd that included the Red Hot Chili Peppers, Johnny Depp, and River Phoenix. Los Angeles was their playground, and they hung out in such infamous haunts as the Viper Room and the Whisky a Go Go. Always one to push things to their limit, Bob partied the hardest and could usually be found at the center of the drama. Drugs weren ' t Bob ' s only passion. He was also a talented musician who commanded the stage as the wild and unpredictable lead singer of Thelonious Monster. They traveled the world, and their future seemed bright and wide open. But Bob ' s demons grew stronger as he achieved more success and he sank deeper into his chemical dependency, which included alcohol, crack, and heroin habits. No matter how many times he went to rehab, sobriety just wouldn ' t stick for him. Soon he saw his once-promising music career slip away entirely. Eventually Bob found a way to defeat his addiction, and once he did, he saw the opportunity to help other hopeless cases by becoming a certified drug counselor. He ' s helped addicts from all walks of life, often employing methods that are very much at odds with the traditional rehab approach. Running with Monsters is an electrifying chronicle of the LA rock scene of the 1980s and ' 90s, the story of a man who survived and triumphed over his demons, and a controversial perspective on the rehab industry and what it really takes to beat addiction. Bob tells his story with unflinching honesty and hard-won perspective, making this a reading experience that shocks, entertains, and ultimately inspires.

In Too Much Free Speech?, Randall P. Bezanson takes up an essential and timely inquiry into the Constitutional limits of the Supreme Court's power to create, interpret, and enforce one of the essential rights of American citizens. Analyzing contemporary Supreme Court decisions from the past fifteen years, Bezanson argues that judicial interpretations have fundamentally and drastically expanded the meaning and understanding of "speech." Bezanson focuses on judgments such as the much-discussed Citizens United case, which granted the full measure of constitutional protection to speech by corporations, and the Doe vs. Reed case in Washington state, which recognized the signing of petitions and voting in elections as acts of free speech. In each case study, he questions whether the meaning of speech has been expanded too far and critically assesses the Supreme Court's methodology in reaching and explaining its expansive conclusions. Bezanson's measured approach and deep insights reveal the complexities of speech in the realms of human behavior and constitutional law. His wide-ranging analysis of relevant Supreme Court cases arms readers with the facts and perspectives necessary to reach independent conclusions about whether the Court's conduct befitted the independent judicial branch and to understand the consequences of its decisions for a representative democracy.

Herodotus wrote the first history book in the world. That is why he is sometimes called the 'Father of History'. He lived 2,500 years ago in the fifth century BC and travelled the Ancient or Classical World. King Leonidas of Sparta and the Battle of Thermopylae, made famous by the blockbuster movie 300, began with Herodotus' historical story.
