centerIn Pursuit of the Ultimate Good After an overwhelming succession of tragedies, life has finally, mercifully ended for Orlene, once-mortal daughter of Gaea. Joined in Afterlife by Jolie -- her protector and the sometime consort of Satan himself -- together they seek out a third: Vita, a very contemporary mortal with troubles, attractions, and an unsettling moral code uniquely her own. An extraordinary triumvirate, they embark on a great quest to reawaken the Incarnation of Good in a world where evil reigns -- facing challenges that will test the very fiber of their beings with trials as numerous, as mysterious, and as devastating as the Incarnations themselves.

The German lied, or art song, is considered one of the most intimate of all musical genres—often focused on the poetic speaker’s inner world and best suited for private and semi-private performance in the home or salon. Yet, problematically, any sense of inwardness in lieder depends on outward expression through performance. With this paradox at its heart, *Intimacy, Performance, and the Lied in the Early Nineteenth Century* explores the relationships between early nineteenth-century theories of the inward self, the performance practices surrounding inward lyric poetry and song, and the larger conventions determining the place of intimate poetry and song in

the public concert hall. Jennifer Ronyak studies the cultural practices surrounding lieder performances in northern and central Germany in the first quarter of the nineteenth century, demonstrating how presentations of lieder during the formative years of the genre put pressure on their sense of interiority. She examines how musicians responded to public concern that outward expression would leave the interiority of the poet, the song, or the performer unguarded and susceptible to danger. Through this rich performative paradox Ronyak reveals how a song maintains its powerful intimacy even during its inherently public performance.

As foretold by ancient prophets, an apocalypse destroyed Earth during the twenty-first century. But two thousand years later Elyon set upon the earth a new Adam. This time, however, he gave humanity an advantage. What was once unseen became seen. It was good and it was called...Green. But the evil Teeleh bided his time in a Black Forest. Then, when least expected, a twenty-four year old named Thomas Hunter fell asleep in our world and woke up in that future Black Forest. A gateway was opened for Teeleh to ravage the land. Devastated by the ruin, Thomas Hunter and his Circle swore to fight the dark scourge until their dying death. That was then. Now the Circle has lost all hope. And Samuel, Thomas Hunter's cherished son, has turned his back on his father and is aligning dark forces to wage the final war. Thomas is crushed--but determined to rescue the Circle and his son even if he has to cross two worlds to do so.

The book represents a contribution to policy formulation and design in an increasingly knowledge economy in Zimbabwe. It challenges scholars to think about the role of education, its funding and the egalitarian approach to widening access to education. The nexus between education, democracy and policy change is a complex one. The book provides an illuminating account of the constantly evolving notions of national identity, language and citizenship from

the Zimbabwean experience. The book discusses educational successes and challenges by examining the ideological effects of social, political and economic considerations on Zimbabwe's colonial and postcolonial education. Currently, literature on current educational challenges in Zimbabwe is lacking and there is very little published material on these ideological effects on educational development in Zimbabwe. This book is likely to be one of the first on the impact of social, political and economic meltdown on education. The book is targeted at local and international academics and scholars of history of education and comparative education, scholars of international education and development, undergraduate and graduate students, and professors who are interested in educational development in Africa, particularly Zimbabwe. Notwithstanding, the book is a valuable resource to policy makers, educational administrators and researchers and the wider community. Shizha and Kariwo's book is an important and illuminating addition on the effects of social, political and economic trajectories on education and development in Zimbabwe. It critically analyses the crucial specifics of the Zimbabwean situation by providing an in depth discourse on education at this historical juncture. The book offers new insights that may be useful for an understanding of not only the Zimbabwean case, but also education in other African countries. Rosemary Gordon, Senior Lecturer in Educational Foundations, University of Zimbabwe Ranging in temporal scope from the colonial era and its elitist legacy through the golden era of populist, universal elementary education to the disarray of contemporary socioeconomic crisis; covering elementary through higher education and touching thematically on everything from the pernicious effects of social adjustment programmes through the local deprofessionalization of teaching, this text provides a comprehensive, wide ranging and yet carefully detailed account of education in Zimbabwe. This engagingly written portrayal will prove illuminating not only to readers interested in Zimbabwe's education specifically but more widely to all who are

interested in how the sociopolitical shapes education- how ideology, policy, international pressures, economic factors and shifts in values collectively forge the historical and contemporary character of a country's education. Teaching Mathematics is nothing less than a mathematical manifesto. Arising in response to a limited National Curriculum, and engaged with secondary schooling for those aged 11 ? 14 (Key Stage 3) in particular, this handbook for teachers will help them broaden and enrich their students' mathematical education. It avoids specifying how to teach, and focuses instead on the central principles and concepts that need to be borne in mind by all teachers and textbook authors—but which are little appreciated in the UK at

present. This study is aimed at anyone who would like to think more deeply about the discipline of 'elementary mathematics', in England and Wales and anywhere else. By analysing and supplementing the current curriculum, Teaching Mathematics provides food for thought for all those involved in school mathematics, whether as aspiring teachers or as experienced professionals. It challenges us all to reflect upon what it is that makes secondary school mathematics educationally, culturally, and socially important.

Specifically written for the O Level Commerce syllabus.
