Often, meditation can feel like you're just sitting there going over your to-do list or thinking about the process of meditation itself, which can cause the time to drag on. Rest assured that you might be going deep into meditation—even if you don't realize it. Like falling asleep, the transition into a deep meditation can be subtle.

number of cultural controversies—the “abstinence vs. safe sex” debate, the diversity movement, communication across genders, the meaning of postmodernism. What emerges in these pages is a theory of evolving ways of knowing that allows us to view adult development much as we ...

In Over Our Heads — Robert Kegan | Harvard University Press

The brain in our head is the driving force of our actions and feelings, and directs what we do, how we feel, and everything else. Just think, a fuckhead cuts you off in traffic, your brain releases chemicals that cause you to feel anger or anxiety, but it is merely chemicals and the reactions they cause that change the way you feel at the ...
