### **Cleanrooms and associated controlled environments**

ISO 14644-2:2015 –Monitoring Plan The monitoring plan shall take into account the output from the risk assessment. □The plan should reflect the level of air cleanliness required, critical locations and performance attributes of the cleanroom.

### **UPDATED ISO 14644 1 & 2**

ISO 14644-1:1999 (superseded): This standard defined classes of cleanliness by airborne particle count concentration following a decimal system. The classes are illustrated in Table C for a series of size ranges. The relationship between ISO class number, particle number concentration, and reference particle size is defined in the standard by the formula  $C_n = 10N \times (0.1 \mu\text{m}/D)^{2.08}$ , where  $C_n$  ...

### **Understanding Cleanliness Classifications for Life Science ...**

With the withdrawal of the Federal Standard 209E, more and more companies and associates will be adopting these standards for the classification of airborne cleanliness classes (ISO 14644-1) and using the second part ISO 14644-2 to specify monitoring protocol (or re-certification of cleanroom) based on the cleanliness classes.
