ASP.NET is an open-source, server-side web-application framework designed for web development to produce dynamic web pages. It was developed by Microsoft to allow programmers to build dynamic web sites, applications and services. It was first released in January 2002 with version 1.0 of the .NET Framework and is the successor to Microsoft's Active Server Pages technology. ASP.NET is built on the Common Language Runtime, allowing programmers to write ASP.NET code using any supported .NET language.
