Anaximander. (born 610 bce, Miletus [now in Turkey]—died 546 bce), Greek philosopher who was the first to develop a cosmology, or systematic philosophical view of the world.

Anaximander | Greek philosopher | Britannica

2,600 years ago, Anaximander became the first person in recorded history to recognize that the earth exists as a solitary body which does not need to rest on top of anything else. Fascinated by the structure of the earth, he produced one of the first ever maps of the world. He did not restrict his thinking to astronomy and geography.

Anaximander - Biography, Facts and Pictures

Carlo Rovelli, a leading theoretical physicist, uses the figure of Anaximander as the starting point for an examination of scientific thinking itself: its limits, its strengths, its benefits to humankind, and its controversial relationship with religion. Anaximander, the sixth-century BC Greek philosopher, is often called the first scientist because he was the first to explain that order in the world was due to natural forces, not supernatural ones.

The first scientist : Anaximander and his legacy in ...

Anaximander (c. 610 - c. 546 BCE) of Miletus was a student of Thales, and recent scholarship argues that he, rather than Thales, should be considered the first western philosopher owing to the fact that we have a direct and undisputed quote from Anaximander while we have nothing written by Thales of Miletus.

Anaximander - Ancient History Encyclopedia

Who was Anaximander? Anaximander, a disciple of Thales of Miletus and a member of the Miletus school, was considered the first scientist in the world to use experimentation through the demonstrative method. He was a scientist who dedicated himself to searching the foundation of all things.
