spread at an astonishing rate. Scary as SARS itself is, the disease is also a warning of many possible such outbreaks to come.

The new killer diseases (2003 edition) | Open Library

Since this disease is caused by a new virus, the vast majority of people do not yet have immunity to it, and a vaccine may be many months away. Doctors and scientists are working to estimate the mortality rate of COVID-19, but at present, it is thought to be substantially higher (possibly 10 times or more) than that of most strains of the flu.
