The Sony A7 And A7r

Sony A7 has a 24.0MP Full frame (35.8 x 23.9 mm) sized CMOS sensor and features Bionz X processor. On the other hand, Sony A7R has a 36.0MP Full frame (35.9 x 24 mm) sized CMOS sensor and features Bionz X processor. Sony A7R's sensor provides 12MP more than Sony A7's sensor, which gives a significant advantage in real life.

Sony A7 vs Sony A7R Detailed Comparison

Camera Shutter and Flash Sync Speed: The Sony A7 has an impressive 1/250 flash sync speed, while the A7R is limited to 1/160. If you are a portrait photographer and you use flash a lot, the A7 will be a better choice for this reason alone. Price: Lastly, there is a \$600 difference in price between the two models.

Sony A7 vs A7R - Key Differences

Meet the world's smallest and lightest 35mm full-frame interchangeable-lens camera. With 36.4 megapixels, the α7R is not just a landmark for all cameras. And with Sony's latest BIONZ X processor and no optical low-pass filter, the α7R offers unmatched lifelike detail.

Full Frame DSLR-Like Camera | a7R E-Mount Compact ... - Sony

Sony set the photography world abuzz when it released its A7 and A7R cameras back in 2013. These diminutive cameras featured the same large 35mm (full-frame) sensors as DSLRs like the Canon 6D and...

Sony A7R vs Sony A7

To take advantage of the lightweight on-the-go body, the α7R full frame compact interchangeable lens digital camera is fully compatible with Sony's E-mount compact and lightweight full-frame lenses from Carl Zeiss and Sony's premier G-series.

Sony a7R Full-Frame Mirrorless Digital Camera - Body Only

The A9 II may be Sony's top performer, but the A7R IV is the high-resolution champ. It uses a 61MP, backside-illuminated (BSI) CMOS sensor. That resolution makes the A7R IV the highest resolution...

A9, A7R, S, II, or III? Making sense of Sony's full-frame ...

The Sony α7, α7R and α7S (the α is sometimes spelled out as Alpha) are three closely related full-frame mirrorless interchangeable-lens cameras. The first two were announced on 16 October 2013 and the third on 6 April 2014. Externally they are identical except for the model number.

Sony $\alpha7$

The a7 and a7R are identical in terms of physical design, with the main differences being the sensor and autofocus system. The a7 features a full-frame 24 megapixel CMOS, while the a7R has a 36 megapixel CMOS sensor with no optical low-pass filter.

Sony Alpha 7R Review

For more tips and tricks about getting the most out of your Sony A7 or A7R, check out my latest book from Peachpit Press, 'Sony A7/A7R: From Snapshots to Great Shots'. These ground-breaking compact full-frame cameras which combine the features and image quality of a top-end DSLR in a smaller camera at half the weight, quickly racked up an impressive list of accolades including Popular Photography's and Photo District News 'Camera of the Year'.

How To Tether Sony A7/A7R/A7S

With the world's first back-illuminated 35 mm full-frame CMOS image sensor with 42.4 megapixels, the Sony α7R II takes image resolution, sensitivity (up to ISO 102,400) and speedy response to new heights.

Full Frame Camera - Sony The Sony a7R, which is a bit more expensive, features a higher-resolution 36.4MP imaging sensor with gapless on-sensor micro lenses, no anti-aliasing filter for sharper image detail, and a slower, yet eminently adequate autofocus system.

The Sony a7 Series: Which Model Suits You Best?

Looking for a Sony A7 II vs Sony A7R IV comparison? The A7 II is less expensive and has bigger pixels. Find out where the A7R IV wins!

Sony A7 II vs Sony A7R IV

The Sony A7 still represents the best value for money, costing (street price) about half of its siblings. It also has a hybrid AF system, that is not spectacularly better than the contrast only AF on the A7r, but is still faster with a good lens. It is a good choice as a first step into full frame cameras.

Sony A7 vs A7r vs A7s

While the 5.76 million-dot EVF of the a7R IV was at the time the best available, I can't see Sony holding onto it again when there's something better in one of their other a7 cameras.

What the a7S III Means for the Sony a7 IV, a9 III, and a7R ...

Jump to conclusion The Sony a7R IV is the company's fourth generation, high-resolution full-frame mirrorless camera and is built around a BSI-CMOS sensor that outputs 60.2MP images. Relative to previous generations, it promises more robust build quality, refined controls, the company's latest autofocus implementation, and more.

Sony a7R IV review

In the early days of the Sony Alpha A7-series there was the A7, the A7R and the A7S. Things were quite simple. The A7S was the high-resolution model and the A7 was the more affordable option. It was fairly easy to choose the right camera.

Which Sony A7 camera? How to choose the right model

Eye AF on Sony A7 III, A7R III, A9 with a Custom Button. Valid for all A7 / A9 cameras. Setting up Eye AF on your Sony A7 III with a custom button offers two main advantages. For older models such as the A7 II series, it is the only way to use this function because there is no real time mode.

Sony A7 III, A7R III, A9 Portrait Settings and Eye AF Setup

Sony Alpha a7 II Mirrorless Digital Camera with 28-70mm and 420-800mm Telephoto Lens + 2X 64GB Memory Card, UV & Close-up Filters, Microphone, Portable Tripod, Gadget Bag & More 5.0 out of 5 stars 1 \$1,049.00 \$ 1,049.00
